**"We cannot always build the future for our youth, but we can build our youth for the future.
"SUCCESS IS A JOURNEY NOT A DESTINATION"**

First I would like to welcome all the students & all of the Institution to National Yuva Computer Saksharata Mission family. It is really a very happy moment when someone new enters in the family. The National Yuva Computer Saksharata Mission family has a qualified, trained and motivated core team of mentors in conjunction with eminent personalities from industry and academia, who ensure the effective development, sharpening and honouring of our "would be professionals".

In 18th Century saw the beginning of Industrial revolution, 19th Century saw beginning of Mechanical Engineering Revolution. The beginning of 20th century saw, in the early 1905, the basis of Atomic Power Revolution by Albert Einstein. In second half century i.e. 1950 onwards, was the beginning of the invention of basic physics of computers. Initially valves were used, however later in 1950 saw the beginning of Transistors, developed into I.C., Micro chips and miniaturization of all parts. Thus the computers slowly started reducing in size and increasing in computing power. All these inventions have major role to play in the material happiness of human beings.

Year 2001 onwards i.e. 21st century will be called rightly as IT century. In the industry & in various branches like design, planning, MIS, Accounts, Personnel, Inventory management, in Banks, in Trade & Commerce and in every office, computer will play major role. The networking and development of Internet & Intranet & use of satellites for communication Video conferencing, have already made earth a Global Village. It is new universal acceptance that computer is undoubtedly the unique scientific invention of the last millennium by human being and proved its importance in every walk of our life and it is the everybody utmost need to make acquaintance with the latest field i.e. Information Technology.

Dear students, "You are the nation-builders. You are the movers of technology. You are the agents of change." It is our ardent hope that the years that you spend in National Yuva Computer Saksharata Mission would enable you to equip with leadership and managerial skills. The knowledge that you will gain, the fine qualities that you will imbibe and the technical skills that you will learn to apply will be your major contribution to your parents, to society, and to the nation. I wish the students a very successful career, I insist that quality of work and constant updating of knowledge is urgent need of computer professionals. Our Institute - Industrial & Computer Management and Research will help the student in achieving this goal.

"You don't have to be great to start, but you have to start to be great."
